0.1 General

ROWAD Modern Engineering is a construction company established in Egypt in 1998. Rowad has been recognized as one of Egypt's most reputable turnkey contractors through diversified alliances with major international contractors enabling the company to undertake multidisciplinary projects of high scale and complexity. Today Rowad is perceived as a key player in a large number of mega projects. In addition to Rowad's well-established operations in Egypt, it has established new branches in KSA, Greece, Iraq, Côte d'Ivoire, Libya, and UAE. Rowad has also expanded its presence across Africa with successful projects in Algeria, Mozambique, Nigeria and the Republic of Chad, hence gaining a strong foothold across Africa and the Middle East.

Rowad Modern Engineering Organization Chart is presented in Appendix (A), illustrating the Top Management and Department Heads.

All over Rowad's operations in Egypt and outside, its scope of work boasts sectors of Power Generation, Heavy Industries, Infrastructure, Bridges, Commercial Buildings, Hospitals, Hotels, Educational Facilities, etc.

0.2 Quality Management Principles

Rowad Modern Engineering adopted and utilized the benefits of Quality Management Principles in its daily activities. The intent of the quality Management Principles is to provide a foundation to continually improve the company's performance. Subsequent sections of the QMS Manual provide Rowad's commitments with the following Quality Management elements:

- Customer focus.
- Leadership.
- Communication and the engagement of our people.
- Process Approach.
- Improvement.
- Performance Evaluation
- Risk & opportunity as well as evidence-based decision making.
- Relationship management
- Climate change

1. Scope of the Quality Manual

This Quality Manual specifies the requirements for the Quality Management system through which Rowad ensures consistent delivery of products and services that meet customer expectations and comply with regulatory requirements. It also highlights how Rowad effectively

	QUALITY MANUAL ISO 9001:2015 QUALITY MANAGEMENT SYSTEM		
	Effective Date: May 2026	Revision No.: 03	Doc. No.: QM-01

applies the system, using a risk-based approach, to strengthen and continually improve its operations, outcomes, and reputation.

This Quality Manual defines the requirements for the Quality Management System (QMS) implemented across our branches inside Egypt and overseas. It ensures the consistent delivery of products and services that comply with applicable standards while fostering continual improvement in operations, outcomes, and organizational reputation through effective alignment with ISO 9001:2015 standards.

ISO 9000:2015 Quality Management System – Fundamentals and vocabulary

ISO 9001:2015 Quality Management System

3. Acronyms, terminology, description and definition

ROWAD Modern Engineering Company adopts the following terms and definitions within its Quality Management System:

Document: Written information used to describe how an activity is done

Record: Captured evidence of an activity that has been done

Risk: Negative effect of uncertainty

Opportunity: Positive effect of uncertainty

Uncertainty: A deficiency of information related to understanding or knowledge of an event, its consequence, or likelihood

Climate Change: Environmental conditions that directly affect manpower, work progress, materials, and equipment.

SWOT Analysis: Strengths, weaknesses, opportunities, and threats—and is a structured planning method that evaluates those four elements of a project or business venture.

EPC: Engineering, procurement & construction.

QMS: Quality Management System

4. Context of the Organization

4.1 The Organization & Its Context

Rowad has determined the external and internal issues, including climate change impacts, that are relevant to its purpose and strategic direction and that affect its ability to achieve the intended results of its quality Management System.

CEO, Quality Assurance Manager, as well as the department managers determine the external and internal Issues, considering issues arising from Legal, Technological, Competitive, Market, Cultural, Social, and Economic Environments. Whether International, Regional, or local.

Rowad monitors and reviews information regarding these external and internal issues at least annually. Rowad applies SWOT analysis to systematically assess the influence of internal strengths and weaknesses, as well as external opportunities and threats.

	QUALITY MANUAL ISO 9001:2015 QUALITY MANAGEMENT SYSTEM		
	Effective Date: May 2026	Revision No.: 03	Doc. No.: QM-01

4.2 Understanding the needs and expectations of interested parties:

Rowad understands the effect or potential effect on its ability to consistently provide products in the construction industry that meet or exceed the customer requirements as well as applicable statutory and regulatory requirements. The relevant interested parties are those that provide significant risks to organizational sustainability or consider contributors to Rowad's success if their needs and expectations are not met. Appendix (C) identifies the interested parties, their requirements and Rowad mechanism.

4.3 Scope of the Quality Management System

Rowad's scope of work boasts sectors of Power Generation, Heavy Industries and Infrastructure, Bridges, Commercial Buildings, Hospitals, Hotels, Educational Facilities, etc.

The Scope of the Quality Management system of Rowad includes:

- Proposals & Tendering
- Project Planning
- Procurement & Purchasing
- Human Resourcing
- Engineering
- Operations

Rowad carries out the check of design for minor issues, and for EPC projects, outsourcing is considered for design scope and Rowad team is coordinating with the service providers to ensure that client requirements are met.

4.4 Quality Management System

Rowad has determined the processes needed for the quality management system and their application throughout the organization in process map & Interactions of processes as shown in Appendix (B).

To ensure effectiveness of the quality management system, Rowad determined, implemented and documented the following in its processes:

- Inputs required and the outputs expected from each process.
- Criteria & methods (including monitoring, measurements and related performance indicators) needed to ensure the effective operation control of these processes.
- Resources needed for these processes.
- Responsibilities and authorities' matrices for each process.
- Risks and action plan.
- Opportunities and action plan

	QUALITY MANUAL ISO 9001:2015 QUALITY MANAGEMENT SYSTEM		
	Effective Date: May 2026	Revision No.: 03	Doc. No.: QM-01

Rowad monitors these processes and makes changes as needed to ensure effectiveness and to enhance Quality management system.

Rowad also maintains documented information to support the operation of its processes and retains documented information to have confidence that the processes are being carried out.

5. Leadership

5.1 Leadership & Commitment

Rowad's top management has demonstrated leadership and commitment with respect to the quality management system through the following:

1. Accountable for the effectiveness of the Quality management system through periodic reviews, objectives evaluation, and resource provision.
2. Establish quality policy and quality objectives for the quality management system and is compatible with the context and strategic direction of the organization.
3. Determine the organizational processes with the quality management system requirement through process map & Interaction.
4. Establish procedure for promoting the use of the process approach and risk-based thinking.
5. Ensure that the resources needed for the quality management system are available, this is being periodically reviewed through management review meeting.
6. Ensure that the quality management system achieves its intended results through management review meeting.
7. Engage, direct and support employees to contribute to the effectiveness of the quality management system by providing training, conducting awareness programs and promoting improvement by introducing suggestion schemes, and conducting meetings.
8. Support other relevant management roles to demonstrate their leadership as it applies to their areas of responsibility.
9. Promote and demonstrate quality culture and ethical behavior

Management Leadership and Commitment is clearly described in the process.

5.1.1 Customer Focus

Rowad's top management demonstrates leadership & commitment with respect to customer's focus by ensuring that:

- Customer & applicable statutory and regulatory requirements are determined, understood and consistently met; through our quality procedure described in "Project Initiation" process.
- Risks and opportunities that may affect product and service conformity, as well as the ability to enhance customer satisfaction, are identified and addressed within relevant company processes.

	QUALITY MANUAL ISO 9001:2015 QUALITY MANAGEMENT SYSTEM		
	Effective Date: May 2026	Revision No.: 03	Doc. No.: QM-01

5.2 Quality Policy

Policy Statement

At **Rowad Modern Engineering**, our mission is to deliver projects that create lasting value for our clients, partners, and communities, while protecting people & the planet. We are committed to uncompromised excellence through the following principles:

Clients & Stakeholders

- Place our clients at the heart of every project by delivering on time, within budget, and to the highest international standards.
- Maintain transparent communication and systematically measure satisfaction to build trust and long-term partnerships.

Safety & Health

- Adopt a "zero harm" philosophy: every incident is preventable.
- Identify hazards, assess risks, & implement controls to protect employees, subcontractors, partners, & communities.

Quality & Innovation

- Apply world-class quality management systems across all projects.
- Drive continuous improvement through benchmarking, lean construction, and innovative engineering solutions.

Technology & Digitalization

- Integrate advanced tools such as BIM, digital twins, modular construction, and AI-driven systems to enhance precision, efficiency, and sustainability.
- Promote a culture of data-driven decision-making and continuous digital transformation across all business units.
- Leverage technology to ensure transparency and optimize performance throughout the project lifecycle.

Environment & Sustainability

- Reduce our environmental footprint by adopting green building practices, energy efficiency, & resource optimization.
- Strive to exceed regulatory requirements and actively contribute to climate resilience and sustainable development.

People & Culture

- Empower employees with continuous training, modern methodologies, and opportunities for professional growth.
- Foster a workplace culture built on respect, diversity, inclusion, well-being, team spirit and collaboration.

Ethics & Governance

- Operate with integrity, accountability, and full compliance with laws, regulations, and ethical standards.
- Ensure strong governance across all operations, supported by transparent decision-making and responsible leadership.

Community Impact

- Support the communities in which we operate by promoting local integration, vocational training, and social initiatives.
- Contribute to long-term socio-economic development and knowledge transfer in every region.

Supply Chain & Partners

- Build long-term, trusted partnerships with vendors based on fairness, performance, and mutual growth.
- Require all partners to align with Rowad's standards for safety, quality, ethics, and sustainability.
- Support and develop local suppliers and subcontractors to strengthen economies and ensure knowledge transfer.
- Continuously assess and benchmark supplier performance to improve reliability and shared success.

Continuous Improvement

We actively encourage feedback from stakeholders and apply lessons learned to strengthen our systems, outcomes, and reputation.

Management's core objective is to ensure that Rowad Modern Engineering and its supply chain remain fully aligned with this Policy

	QUALITY MANUAL ISO 9001:2015 QUALITY MANAGEMENT SYSTEM		
	Effective Date: May 2026	Revision No.: 03	Doc. No.: QM-01

5.3 Organization Roles, Responsibilities & Authorities

Rowad management ensures that the responsibilities and authorities for all relevant roles are assigned, communicated and understood within the organization through Rowad's standard processes and Job descriptions. While assigning roles, responsibility and authority, top management has considered and ensured that:

1. The quality management system conforms to the requirements of this International Standard.
2. Processes achieve their intended output through assigned controls, with performance and improvement opportunities reported to top management via internal audits and management review meetings.
3. The promotion of "Customer Focus" throughout the organization, through Rowad's standard process of Customer Satisfaction.
4. The Quality management system is maintained when changes to the system are planned and implemented through our Control of Documents & Communication Process.

6. Planning

6.1 Actions to address risks and opportunities

Rowad considers the Organization and its context, the Organization's needs and expectations, as well as the Risk and Opportunities in its Quality Management System, QMS. Rowad addressed the Risk and Opportunities in its main processes to:

- Ensure that the quality Management System can achieve its intended results.
- Enhance the desirable effects in opportunities.
- Prevent, or reduce the undesirable effect of risks
- Achieve improvement in the processes.
- Stronger focus on business continuity & organizational resilience.

Rowad has integrated and implemented actions to address risk and opportunity into its Quality Management System.

6.1.1 Actions

Rowad plans actions to address risks and opportunities and evaluate the effectiveness of these actions, which are proportionate to the potential impact on the conformity of products and services.

6.2 Quality Objectives

Rowad establishes the quality objectives to turn broad policy statements into practical, measurable actions that drive improvement and customer satisfaction.

	QUALITY MANUAL ISO 9001:2015 QUALITY MANAGEMENT SYSTEM		
	Effective Date: May 2026	Revision No.: 03	Doc. No.: QM-01

6.3 Planning for Changes

Rowad determines the need for changes to the quality management system. Rowad considers the following:

- Purpose of the changes and their potential consequences
- The impact of the changes on the Quality Management System
- Resource availability
- Allocation or reallocation of responsibilities and authorities

The Request for Document Change Form shall be used to address and manage requests for changes. Any changes related to internal or external issues and interested parties shall be discussed with the CEO. The impact of changes as well as the plan for change shall be prepared by the Quality Assurance manager.

7. Support

7.1 Resources

7.1.1 General

Rowad determines and provides the resources needed for the establishment, implementation, maintenance and continual improvement of the quality management system. Rowad consider the following:

- Capabilities for, and constraints on, existing internal resources
- What needs to be obtained from external providers
- Possible software validation for monitoring/measurement tools.

Rowad determines and provides the resources needed to implement and to maintain the quality management system and to continually improve its effectiveness and to enhance customer satisfaction by meeting customer requirements.

7.1.2 People

Rowad determines and provides the necessary people for the effective implementation of its quality management system and for the operation and control of its processes. Rowad's Manpower Planning and Talent Acquisition Process is addressed in detailed steps. Human Resources Department, along with respective processes in charge, ensure that personnel performing work affecting quality are competent and qualified. The Talent Development Process addresses the steps for training.

	QUALITY MANUAL ISO 9001:2015 QUALITY MANAGEMENT SYSTEM		
	Effective Date: May 2026	Revision No.: 03	Doc. No.: QM-01

7.1.3 Infrastructure

Rowad determines, provides and maintains the infrastructure necessary for the operation of its processes and to achieve conformity of products and services. Also, Rowad expands to include digital infrastructure (remote work platforms, automated systems, AI-driven tools, e.g. ERP, Unifier, Cost-OS, Hits, CRM, etc.). The infrastructure includes:

- Buildings and associated utilities.
- Equipment, including hardware.
- Transportation resources.
- Information and communication technology.

7.1.4 Environment for the Operation of Processes

Rowad determines, provides and maintains the environment necessary for the operation of its processes and to achieve conformity of products and services. The environment necessary for the operation includes:

- Social
- Psychological
- Physical

7.1.5 Monitoring & Measuring Resources

Rowad determines and provides the resources needed to ensure valid and reliable results when monitoring or measuring is used to verify the conformity of products and services to requirements. Quality Process Control of Measuring Devices defines the steps needed to monitor and verify the measuring equipment. Also, Rowad focuses on managing digital processes, automation, AI, and data security as part of the QMS.

7.2 Competence

Rowad assesses the competence of all its personnel based on their education and experience, ensuring it meets the standards required to maintain the performance and effectiveness of the Quality Management System. Training and development are carried out according to the annual training plan, which is designed based on identified staff requirements and needs.

Rowad, where applicable, acquires and retains the necessary documents/ sources that prove competence, and evaluates the effectiveness of these sources; more details are mentioned in the "Training and Development" Process.

7.3 Awareness

Rowad Modern Engineering ensures that people doing work under its control are aware of:

	QUALITY MANUAL ISO 9001:2015 QUALITY MANAGEMENT SYSTEM		
	Effective Date: May 2026	Revision No.: 03	Doc. No.: QM-01

- a) The quality policy which is posted and communicated.
- b) Relevant quality objectives and KPIs.
- c) Their contribution to the effectiveness of the quality management system, including the benefits of improved performance, through PDCA cycle across all company's processes.
- d) Online recorded awareness created for the entire processes.
- e) The implication of not conforming with the quality management system requirements, linked with the quality objectives score.
- f) The quality culture and ethical behavior as part of their responsibilities

7.4 Communication

ROWAD Modern Engineering determines the internal and external communications relevant to the quality management system.

The control of communication is carried out for external and internal communication and addressed in "Control of Documents & Communication" Process.

7.5 Documented Information

7.5.1 General

Rowad Modern Engineering quality management system includes:

- a) Documented information required by ISO 9001:2015.
- b) Documented information as determined by Rowad to be necessary for the effectiveness of the quality management system.

Rowad stresses greater attention to managing digitalization, automation, AI, and data protection.

7.5.2 Creating & Updating

When creating documented information, Rowad ensures appropriate:

- a) Identification and description (e.g. title, date, or reference number).
- b) Format (e.g. language, software version, graphics) and media.
- c) Review and approval for suitability and adequacy.
- d) Tracking logs.

7.5.3 Control of Documented Information

Documented information required by the quality management system and by ISO 9001:2015, are controlled to ensure:

- a) Availability and suitability for use, where and when it is needed via Rowad e-filing system created per project/department.

	QUALITY MANUAL ISO 9001:2015 QUALITY MANAGEMENT SYSTEM		
	Effective Date: May 2026	Revision No.: 03	Doc. No.: QM-01

- b) It is adequately protected during the project life cycle and close-out (e.g. from loss of confidentiality, improper use, or loss of integrity).

For the check of documented information, Rowad has addressed the following activities, as applicable:

- a) Distribution, access, retrieval and usage (e.g., stamps & distribution matrix)
- b) Storage and preservation, including preservation of legibility in Rowad premises.
- c) Control of changes (e.g. version control).
- d) Retention and disposition.

Documented information of external origin is identified and controlled by Rowad to ensure it is necessary for the planning and operation of the quality management system.

Documented information retained as evidence of conformity is protected from unintended alterations.

“Control of Records, Filing, Archiving and Backup Process” details all information regarding the documented information.

8. Operation

8.1 Operational Planning and Control

- Rowad plans, implements and controls the processes needed to meet the requirements for the provision of products and services.
- Rowad manages external providers/suppliers and upstream/downstream lifecycle impacts, considering the following:
 - Climate change adaptation/mitigation
 - Biodiversity protection
 - Lifecycle perspective beyond direct operations
 - Emergency (e.g., fire, spill, explosion). vs. abnormal operations (e.g., process start-up/shutdown, maintenance).

8.2 Requirements for Products and Services

8.2.1 Customer Communication

Rowad's communications with Customers include:

	QUALITY MANUAL ISO 9001:2015 QUALITY MANAGEMENT SYSTEM		
	Effective Date: May 2026	Revision No.: 03	Doc. No.: QM-01

- a) Providing information relating to products and services.
- b) Handling inquiries, contracts or orders, including changes.
- c) Obtaining customer feedback relating to products and services, including customer complaints and customer satisfaction surveys.
- d) Handling or controlling customer property.
- e) Establishing specific requirements for contingency actions, when relevant.

8.2.2 Determining the requirements for products and services

When determining the requirements for the products and services to be offered to customers, ROWAD Modern Engineering ensures that:

- a) The requirements for the products and services are defined, including:
 - I. Any applicable statutory and regulatory requirements.
 - II. Those considered necessary by the organization.
- b) Rowad can meet the demands of the products and services.

8.2.3 Review of the requirements for products and services

Rowad ensures that it can meet the requirements for products and services to be offered to customers by conducting a review before committing to supplying products and services to a customer.

8.2.4 Changes to requirements for products and services

ROWAD Modern Engineering ensures that relevant documented information is amended, and that relevant people are made aware of the changed requirements when the requirements for products and services are changed.

8.3 Design and development of products and services

Rowad carries out the check of design for minor issues, and for EPC projects, outsourcing is considered for design scope and Rowad team is coordinating with the service providers to ensure that client requirements are met. Refer to "Engineering Process".

8.4 Control of externally provided processes, products and services

8.4.1 General

ROWAD Modern Engineering ensure that externally provided processes, products and services conform to requirements of the related activity.

Rowad determines and applies criteria for the evaluation, selection, monitoring of performance, and re-evaluation of external providers, based on their ability to provide processes or products and services in accordance with requirements. Rowad retains documented information about these activities and any necessary actions arising from

	QUALITY MANUAL ISO 9001:2015 QUALITY MANAGEMENT SYSTEM		
	Effective Date: May 2026	Revision No.: 03	Doc. No.: QM-01

the evaluations. The steps of evaluation are explained in detail in the "Evaluation of External Providers Process".

8.4.2 Type and extent of control

Rowad ensures that externally provided processes, products and services do not adversely affect Rowad's ability to consistently deliver conforming products and services to its customers.

8.4.3 Information for External Providers

Rowad ensures the adequacy of requirements prior to their communication to the external provider. The procedures are explained in detail in "Subcontractor Management" Process.

8.5 Production and Service Provision

8.5.1 Control of Production and Service Provision

ROWAD modern Engineering implements production and service provision under controlled conditions.

"Control of Production", "Material Inspection" & "Quality Plan Inspection and Testing" Processes define the required procedures to control Rowad output products.

8.5.2 Identification and Traceability

ROWAD Modern Engineering uses suitable means to identify its output when it is necessary to ensure the conformity of products and services. Rowad identifies the status of outputs with respect to monitoring and measuring requirements throughout production and service provision. Rowad controls the unique identification of the outputs when traceability is a requirement and retains the documented information necessary to enable traceability. Process "Control of Documents & Communication" explains such procedures along with "Equipment Management" & Control of measuring devices Process.

8.5.3 Property Belonging to Customers or External Providers

Rowad exercise care with property belonging to customers or external providers while it is under Rowad's control or being used by Rowad through handling & controlling customers' custody following the company process.

Rowad identifies, verify, protect and safeguard customer's or external providers' property provided for use or incorporation into the products and services.

When the property of a customer or external provider is lost, damaged or otherwise found to be unsuitable for use, Rowad reports this to the customer or external provider and retains documented information on what has occurred. Process "Material Control" explains such procedures.

	QUALITY MANUAL ISO 9001:2015 QUALITY MANAGEMENT SYSTEM		
	Effective Date: May 2026	Revision No.: 03	Doc. No.: QM-01

8.5.4 Preservation

Rowad preserves the outputs during production and service provision, to the extent necessary to ensure conformity to requirements.

8.5.5 Post-delivery Activities

Rowad meets requirements for post-delivery activities associated with the products and services according to DLP warranties.

In determining the extent of post-delivery activities that are required, Rowad considers:

- a) Statutory and regulatory requirements.
- b) The potential undesired consequences are associated with its products and services.
- c) The nature, usage and intended lifetime of its products and services.
- d) Customer requirements and feedback.

8.5.6 Control of Changes

Rowad reviews and controls changes for production or service provision, to the extent necessary to ensure continuing conformity with requirements.

Rowad retains documented information describing the results of the review of changes, the person(s) authorizing the change, and any necessary actions arising from the review. Process "Control of Documents & Communication" explains such procedures.

8.6 Release of Products and Services

Rowad implements planned arrangements, at appropriate stages, to verify that the product and service requirements have been met. The release of products and services to the customer does not occur until the planned arrangements have been satisfactorily completed, unless otherwise approved by a relevant authority and, as applicable, by the customer.

Process "Quality plan Inspection & Testing" & "Control of Production" defines the required procedures to release the output products of Rowad.

8.7 Control of Nonconforming Outputs

ROWAD Modern Engineering ensures that outputs that do not conform to their requirements are identified and controlled to prevent their unintended use or delivery.

Rowad takes appropriate actions based on the nature of the nonconformity and its effect on the conformity of products and services. Process "Control of Non-Conformity" explains such procedures.

	QUALITY MANUAL ISO 9001:2015 QUALITY MANAGEMENT SYSTEM		
	Effective Date: May 2026	Revision No.: 03	Doc. No.: QM-01

9. Performance Evaluation

9.1 Monitoring, Measurement, Analysis and Evaluation

9.1.1 General

ROWAD Modern Engineering evaluates continually the performance and the effectiveness of the quality management system through quality performance indicators (QPI) and key performance indicators (KPI).

9.1.2 Customer Satisfaction

ROWAD Modern Engineering monitor customers' perceptions of the degree to which their needs and expectations have been fulfilled via customer satisfaction surveys. Rowad determines the methods for obtaining, monitoring and reviewing this information with proper analysis and action. Such procedures are explained in "Customer Satisfaction" Process

9.1.3 Analysis and Evaluation

ROWAD Modern Engineering analyze and evaluate appropriate data and information arising from monitoring and measurement.

The results of analysis are used to evaluate:

- a) Conformity of products and services.
- b) The degree of customer satisfaction.
- c) The performance and effectiveness of the quality management system.
- d) If planning has been implemented effectively.
- e) The effectiveness of actions taken to address risks and opportunities.
- f) The performance of external provider initially & periodically.
- g) The need for improvements to the quality management system.

9.2 Internal Audit

Rowad Modern Engineering conducts internal audits at planned intervals to provide information and assure that quality management system conforms to Rowad processes and ISO 9001: 2015 based on the annual audit program & plan.

All procedures of internal audit are outlined in Process "Internal Audit".

9.3 Management Review

9.3.1 General

Rowad Modern Engineering's top management conduct an annual review of the Quality Management System across all branches and projects to ensure its continued suitability,

	QUALITY MANUAL ISO 9001:2015 QUALITY MANAGEMENT SYSTEM		
	Effective Date: May 2026	Revision No.: 03	Doc. No.: QM-01

adequacy, effectiveness, and alignment with Rowad's strategic direction, such procedures are explained in "Management Leadership and Commitment" & "Internal audit" Processes.

10. Improvement

10.1 General

ROWAD Modern Engineering identifies and selects opportunities for improvement and implements any necessary actions to meet customer requirements and enhance customer satisfaction.

These include:

- a) Improving products and services to meet requirements as well as to address future needs and expectations.
- b) Correcting, preventing or reducing undesired effects.
- c) Improving the performance and effectiveness of the quality management system.
- d) Focusing on innovation, stakeholder satisfaction, resilience improvements.

10.2 Nonconformity and Corrective Action

When a nonconformity occurs, including any arising from complaints, Rowad takes appropriate actions as per process "Control of Non-Conformity" Process.

10.3 Continual Improvement

ROWAD Modern Engineering continually improves the suitability, adequacy and effectiveness of the quality management system.

Rowad conducts analyses and evaluations, including management reviews and Lessons Learned surveys, to identify arising needs or opportunities for continual improvement. Rowad's standard processes "Project Closeout" and "Management Leadership and Commitment" describe such procedures.

11. Document Change History
